

Exposure to ambient air pollution and fetal death in Harris County, Texas

Amal Rammah, MPH

Doctoral Candidate, Human Genetics and Environmental Sciences

University of Texas School of Public Health

Amal Rammah is a doctoral candidate in environmental sciences, epidemiology and global health at The University of Texas Health Science Center at Houston (UTHealth) School of Public Health. Her current research focuses on air pollution and adverse birth outcomes. Amal's broader research interests include chronic diseases, health disparities and the complex interplay between environmental and social stressors on health. Amal completed her bachelor's of science degree in environmental sciences at the American University of Beirut in Beirut, Lebanon and her Master's of Public Health (MPH) degree in environmental and occupational health at the George Washington University in Washington, DC.
