

# GCDTR MEMBERSHIP FORM

## About the Georgia Center for Diabetes Translation Research

---

The GCDTR - a partnership between Emory University, the Georgia Institute of Technology, and Morehouse School of Medicine - offers Translation Research Cores (Design and Evaluation; Engagement and Behavior Change; and Disparities) designed to be responsive to the need to close remaining gaps in diabetes detection, prevention, and care, and to the changing profile of the U.S. diabetes population. GCDTR brings a spirit of innovation, collegiality, multi-disciplinarity, inclusivity, and continued learning towards promoting more and useful diabetes translation research.

To become a member, please take a moment to fill out this form.
