

Health insurance and care in the diabetic Medicaid population - Effects of the ACA Medicaid Expansion

Karl Emmert-Fees, BS

Karl Emmert-Fees is a visiting research scholar with the Emory Global Diabetes Research Center. He has a bachelor's degree in social economics with a specialization in health economics from the University of Erlangen-Nuremberg. His thesis was about gender effects in informal elderly care and its association with employment across Europe. Currently, he is doing his master's degree in public health at the LMU Munich, which will be finished at the end of 2018. During his stay at Emory University he has worked on several projects, including the effects of Medicaid expansion in people with diabetes and an in progress project using diabetes intervention trial data from India. The latter will be closely connected to his master thesis, which he will write after returning to Germany. Additionally, he has supported projects of Michael Laxy, PhD, who is a visiting Harkness Fellow in Health Care Policy and Practice, and Mohammed K. Ali, a core faculty member of the EGDRC, working on ongoing research projects focusing on prevention and treatment of type 2 diabetes.
