

Cost-effectiveness and budget impact of lifestyle intervention for diabetes prevention in the Medicaid population

Michael Laxy, PhD, MSc, MPH

Head, Working Group on Economics and Management of Diabetes,
Institute of Health Economics and Health Care Management-
Helmholtz Zentrum München

Harkness/B. Braun Fellow for Health Care Policy and Practice

Michael Laxy leads a working group on Economics and Management of Diabetes at the Institute of Health Economics and Health Care Management at the Helmholtz Zentrum München, Germany. His research focuses on economic evaluation of prevention and treatment strategies for metabolic diseases, and the analysis of health policies targeting patient health behavior and quality of care. He is a co-investigator on the population-based KORA research platform in Southern Germany.

Currently, Dr. Laxy is a Harkness/B. Braun Fellow in Health Care Policy and Practice working at the Centers of Disease Control and Prevention -Division of Diabetes Translation and the Emory Global Diabetes Research Center. His fellowship project focuses on implementation aspects and the cost-effectiveness of life-style based diabetes prevention in the Medicaid population.
